ABOUT ME

Hi, I'm **Dan** owner and founder of **Detail Valets**.

I'm a long time car enthusiast, with a particular passion for the detailing side of things. My journey began with a mission: to offer a convenient, high quality alternative to the cheap roadside car washes because, let's be honest, they're not always the best choice for your vehicle's long term condition.

MY BACKGROUND

Before all of this, I served in the forces, where I learned that discipline, precision, and pride in your work aren't optional they're essential. Every job had to pass inspection, and every detail mattered. I've carried that same mindset into my business, where every vehicle I touch leaves inspection ready.

WHAT WE DO

Detail Valets provides high quality detailing services across Greater Manchester with an eye for detail and a commitment to excellence, we aim to present your vehicle to a standard that's better than showroom condition.

We only use the kindest, highest quality products to clean and protect your vehicle. Paired with expert techniques, we ensure every detail is carried out in the safest possible way for your car's paintwork and interior surfaces.

DEEP CLEAN

From £199

Takes approximately 4 hours to complete

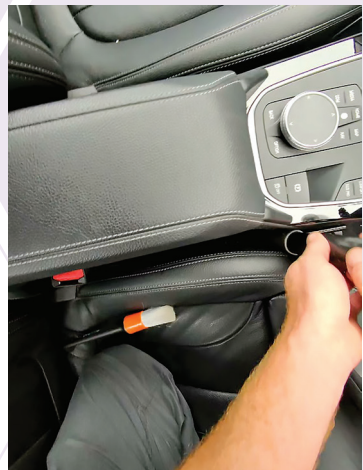

Our most popular package, the Deep Clean is a full reset for your car inside and out. Covering everything from wheels and arches to carpets and upholstery, this service is designed to restore your car to a near-new condition. It also includes 6 months of exterior paint protection as standard.

CERAMIC COATING PACKAGE

From £399

Takes approximately 5 hours to complete

Protect your vehicle with professional ceramic coating, applied using Reign Ceramic Coating for a deep, showroom quality gloss that lasts. Our service bonds a durable protective layer to your car's paintwork, defending against UV damage, road salt, bird lime, and the harsh North West weather, while significantly cutting down your maintenance time between washes.

Choose from our standard 7 year ceramic coating or upgrade to our premium 10 year coating both delivering long term paint protection that keeps your car looking immaculate.

What's included

- Exterior safe wash including door shuts and feather brushing for the more intricate areas
- Complete wheel, tyres & arch deep cleaned and decontaminated
- Exhaust tips will undergo the same process as the wheels at the same time
- A further decontamination & wash to remove embedded iron & tar deposits
- Tar removal to remove the final remnants left over from the previous decontamination process
- Clay bar process
- Dried with plush paint safe towel
- Gloss Enhancing Machine Polish to prepare the surface
- Tyres & arches dressed with long lasting coating
- Full exterior wipe down with panel wipe in preparation for ceramic coating
- Ceramic Coating applied

- Tar removal as required
- Dried with plush paint safe towel
- Tyres & arches dressed
- Paint protection Maintained
- Interior & exterior glass cleaned
- Rubbish removed
- Interior Vacuum including boot if empty
- Mats cleaned
- Interior surfaces cleansed & refreshed
- Fragrance

WHAT IS PAINT CORRECTION AND DO YOU NEED IT?

Paint correction is a professional process that removes defects from your car's clear coat the protective layer that sits on top of the paint. Over time, washing, road use and general wear create swirl marks, fine scratches and dull patches that can't be fixed with a simple clean. Machine polishing uses a rotary or dual action polisher with specialist compounds to carefully level the clear coat and eliminate those imperfections, restoring genuine depth, clarity and gloss.

There are two main approaches depending on the condition of your paintwork. A single stage enhancement polish which is what we offer as standard removes light swirl marks and surface defects, dramatically improving the overall finish. It suits most vehicles that have been regularly washed but haven't been corrected before. Multi-stage correction goes deeper, using a more aggressive cut followed by a finer polish to tackle heavier scratches, oxidation and more severe swirling. This is typically needed for older vehicles or cars with neglected paintwork.

In both cases, paint correction is the essential first step before ceramic coating because any defect sealed under a coating stays there permanently.

BENEFITS OF CERAMIC COATING

A ceramic coating does more than just make your car shine, it adds a tough, protective layer that keeps your paintwork looking newer for longer. From defending against the elements to making cleaning effortless, here are the key benefits you'll enjoy with our Reign Ceramic

Coating service:

- 7 or 10 year warranty
- UV Protection
- Chemical Resistant
- Repels Water, Dirt & Grime
- High Gloss Finish
- Reduced Maintenance
- Helps Protect Your Investment

DETAIL VALETS

Greater Manchester's most trusted mobile car valeting and detailing specialist.
